

B&B HOTEL LJUBLJANA PARK

**SUSTAINABILITY
REPORT**

2020-2021

January 2022

B&B Hotel Ljubljana Park Urban & Green

SUSTAINABILITY REPORT

We are committed to sustainable development, promoting respect for the environment and connecting with local communities. "Reduce, reuse and recycle" are our main guiding principles.

What have we done for a better world in 2020, 2021? The past year was marked by the COVID-19 virus, which has shaken the whole world, individuals and societies. At B&B Hotel Ljubljana Park, we nevertheless remained committed to sustainable business, and we even used this crisis to carry out certain projects that help make business friendlier for the environment and the society.

Terrace on the roof of the hotel

The entire roof, about 500m², was renovated, completely re-insulated, protected and arranged in a friendly way for bees and visitors.

We have been hosting four bee families on the roof for many years, and in order to make their stay even more pleasant, we set up a friendly green garden, where we plant honey plants, evergreens and herbs, which the kitchen uses to prepare meals.

The remaining part of the terrace was equipped with new windows and furniture that allows guests to retreat from the hustle and bustle of the city and enjoy the view of the city of Ljubljana.

Rooms

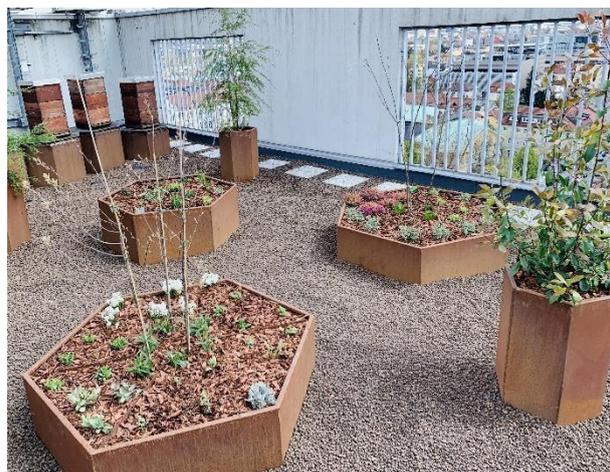

We also completed the renovation of 100 hotel rooms, changing worn-out plumbing and electrical installation, all toilet bowls, which were replaced with more economical ones, and placing LED lights everywhere.

Elevators

We fully replaced old, wasteful elevators with more energy-efficient and larger ones that also have a bigger capacity. We still encourage guests, employees and tenants to

REDUCE, REUSE, RECYCLE

use stairs instead of elevators.

Green cleaning

B&B Hotel Ljubljana Park has been successfully applying the green cleaning policy for many years; this is our own project and we will continue to do so in the future. This means offering our guests the opportunity to decide how often and if they want their room cleaned and they can thus help reduce the impact on the environment - less cleaning agents in waterways, lower water and energy consumption.

Energy

In recent years, B&B Hotel Ljubljana Park has already reduced energy consumption by installing low-energy lighting, taking measures to ensure that air conditioning and heating is set to the most moderate temperature, and using natural daylight and shading to achieve energy efficiency. We have our own Tesla charging stations. We inform guests and employees about the importance of saving energy and remind them to act sustainably.

Waste

B&B Hotel Ljubljana Park continues to reduce the amount of waste, especially by reducing the number of resources used, reusing materials and recycling, using refillable packaging, buying materials in larger packages, and using recycled toilet paper. We recycle almost 100% of waste generated in the building and measure it, so we have a clear understanding of the type of waste generated.

Water

The hotel uses a variety of water-saving methods, including technologies installed in guest rooms such as low-flow faucets and showers, educating and raising awareness. By promoting tap water as drinking water in Ljubljana, we reduced the number of plastic bottles in our waste.

Supporting people

Travelife certification indicates that the hotel is committed to treating people fairly and respectfully. In addition to providing good working conditions for employees and investing in employees, B&B Hotel Ljubljana Park is an active member of the local community. We support the local population by organizing open events on the roof and in front of the hotel, we sponsor several cultural events, and in the summer, we organize a library in the park. We organize and participate in the cleaning of our neighbourhood.

SAY NO TO PLASTIC

Local businesses and the economy

We strive to support the economy in the local community by purchasing food and other services from local suppliers and encouraging guests to visit local restaurants, markets and attractions. This not only supports the local economy, but also promotes it, as we have a wide and interesting structure of guests. In the events we organize, we also invite local residents who create "green" products to connect them with each other and with guests and tourists.

Communication with guests

We actively involve guests in our sustainable activities, such as encouraging recycling, and while staying at the hotel, they decide for themselves when and if they would like their room cleaned. In all the hotel floors, we display information about protected areas, such as Slovenian regional parks, teach them about the Carniolan bee, and offer them healthy and locally produced food. We also offer a 15% discount on the stay to the guests who use public transport for travel. This way, we want to raise awareness about the choice of green transport and accommodation.

Animals

In addition to the daily environmental measures, the hotel also focuses on protecting the environment and the bees. The hotel has beehives on the roof that produce urban-forest honey, which we use for business gifts, for breakfast, instead of sugar in our pastries and ice cream. We also feed the bees with this honey in the winter to avoid adding sugars and syrups. In 2021, our hard-working bees, despite a very poor harvest, produced 35 kg of honey.

The bees in the hotel also play an important role in raising the awareness among visitors and teaching guests and nearby schools and kindergartens about the importance of these wonderful animals.

Respect for human and workers' rights

Respect for human rights is a key component of our business and fundamental to our ability to operate as a green and sustainable hotel. At the Hotel Park Ljubljana, respect for human rights is rooted in our culture and guides our interactions with employees, partners, guests and the local community.

"Green" Business and other meetings

Although sustainability may not be the first thing on a business guest's mind, we try to communicate and educate about the importance of green business travel. We also refreshed our conference rooms with recycled materials to make meetings more sustainable

Knowledge is key to sustainability. We strive to teach and to learn.

and enjoyable.

GOALS

REDUCE, REUSE, RECYCLE...REMAIN OUR GUIDING PRINCIPLES

ENCOURAGE EMPLOYEES, GUESTS, SUPPLIERS AND OTHER VISITORS TO CONDUCT AND DO BUSINESS IN A SUSTAINABLE MANNER

PROMOTE HEALTHY LIVING

CONTINUE WITH OUR "GREEN" CLEANING POLICY

ENSURE A SAFE, CLEAN AND PLEASANT LOCAL ENVIRONMENT IN COOPERATION WITH NEIGHBOURS

PROMOTE SUSTAINABLE PRODUCTION AND CONSUMPTION

ENCOURAGE GUESTS TO TRAVEL AND LIVE IN A SUSTAINABLE WAY

Be the change you want to see in the world.

*The goals for 2022 and 2023 are specified in the document SUSTAINABLE ORIENTATION OF THE HOTEL - ENVIRONMENTAL POLICY.
